

InspectLED Luminaire

DESCRIPTION:

Luminaire designed to illuminate extremely inaccessible spaces or deep holes. The 17 mm diameter lamp head contains one LED, angled at 45° and covered with tempered glass. The head is carried by a flexible hose with a standard length of 450 mm, ending in a handle with a switch. The handle houses an electronic power supply, operating in the supply voltage range 10-40V DC or 12-35V AC. The luminaire is supplied with a 2m cable as standard.

If you do not have a low voltage power supply on your machine, you will find suitable power supplies in the Accessories and Spare Parts section.

TECHNICAL PARAMETERS:

- Supply voltage 10 to 40 V DC, 12 to 35 V AC
- Consumption 2 W
- Light source LED Cree XP-G3 Ra=80
- Luminous flux 320 lm
- Minimal lifetime 50 000 h
- Ingress protection IP67
- Ambient operating temperature -20 to +50°C

ADVANTGES:

- Small dimensions of the luminaire
- Shock and vibration resistant
- High luminous flux

DIMENSIONS:

- Luminaire body diameter 17 mm
- Luminaire body length 65 mm
- Flexible tube length 450 mm
